# ACCESS TO QUALITY EDUCATION

## IMPACT | OPPORTUNITY | SUSTAINABILITY

The Queen Elizabeth Academy (QEA) in Mlali, Tanzania has become a beacon of hope and is changing the way people view education in the community. QEA began as a feeding center and naturally developed into a school after the community saw the positive impact it was having on the children. The school follows the 2-for-1 model (for every two students paying tuition, one receives free education), which has provided the opportunity to offer free education to the children in Mlali who would otherwise be unable to attend.

With the support of Mama Hope, QEA is aiming to provide affordable education for all by building a boarding house, which will attract paying students outside of Mlali, increasing the capacity to offer a loving home and free education to children from vulnerable situations. I will be working with the QEA team to implement these life-changing projects and have committed to raising \$20,000 to support the expansion of the school and the dreams of the children.

**"I believe that all children deserve a high quality education, and to be able to live out the dreams they have for their lives and their families."**

**– Kilines Sekwiha, Founder of QEA**

I am raising \$20,000 to support the school's expansion, and will travel to Tanzania in October to work directly with the community! To learn more or donate online, please visit [give.classy.org/JessQEA](https://give.classy.org/JessQEA)!
